European responsible importer:  
Starmark Inc.  
Osterkamp 11  
32457 Porta Westfalica, NRW Germany  
Phone: +49 5731 98 200-0  
Email: [info@portapet.de](mailto:info@portapet.de)

### 5. Material:

Pro-Training Clickers are made from a stainless steel clicker element inside a nylon housing.

### 6. Characteristics:

#### 6.1 Scent:

Unscented.

#### 6.2 Color:

Pro-Training Clicker	Blue with orange button
Pro-Training Clicker Deluxe	Black with yellow button
Pro-Training Quicker Clicker	White with gray button

#### 6.3 Sizes:

Varies by product type.

### 7. Functionality:

Pro-Training Clickers are training aids based on the scientific principles of classical and operant conditioning to enhance dogs' training results by encouraging the behaviors that lead to rewards. These training aids are designed to be used under supervision. The stainless steel clicker element produces a clear, consistent sound. Once this sound is paired with a reward, it communicates a message of "job well done" and makes desired behaviors more likely to reoccur.

### 8. Available products:

### 9. Traceability:

All Starmark Pro-Training Clickers are sold in Starmark packaging. Our warehouse practices FIFO (first in/first out) to ensure proper inventory rotation. Packaging lists both US and EU contact information for consumer inquiries starting late 2025.

### 10. Identification of potential hazards:

Danger	Description	Examples of risk situations
Breakage	Clicker button or clicker body breaking.	Button or plastic pieces may be ingested or pose a choking hazard.
Choking	Small products may pose choking hazard.	Small size of product may pose choking hazard.
Misuse	Leaving product unattended with pet or children.	Product may pose choking hazard to pets or children.

### 11. Risk assessment:

#### Evaluation matrix:

- Probability: Low, Medium, High
- Impact: Low, Medium, High
- Total Risk: Low, Medium, High

Danger	Probability	Impact	Total Risk	Comments
Breakage	Medium	High	Medium	Starmark uses durable nylon to reduce the likelihood of breakage during normal training use.
Choking	Low	High	Medium	Small size of product may pose a choking hazard. Clickers are not recommended for chewing or unsupervised use.
Misuse	Low	High	Low	Products are clearly marked for dog training use.

#### **12. Mitigation measures:**

##### **12.1 Safe material**

Starmark Pro-Training Clickers are made from a stainless steel clicker element housed inside a nylon body.

##### **12.2 Durable and functional design**

Starmark Pro-Training Clickers are made of a durable material to withstand prolonged and repeated training usage.

##### **12.3 Labeling and information**

Usage information is included in packaging and online.

##### **12.4 Compliance testing**

Both mechanical and live testing is conducted on all product prototypes prior to launch for safety and durability.

##### **12.5 Risk monitoring and management**

Defective products that do not meet quality standards are culled during the manufacture process.

#### **13. Labeling and usage tips**

For training use.

Pets should be supervised during the use of this product.

Products smaller than the mouth may present a choking hazard.

Hand wash recommended.
